I would like to write about the film "Wonder" which I have seen recently. The film which is a family drama was released in 2017 and was directed by Stephen Chbosky. The film stars Julia Roberts as the boy's mother. The story, set in New York, is about the boy who suffers from a rare genetic disease and has a deformed face. The film has received many awards.

The story begins when Auggie who has been home-schooled by his mother, goes to a real school for the first time. At school other children make fun of him and even bully him. One day he helps a boy called Jack with the test and then they become close friends. On Halloween, however, Jack says to other children that he only pretends to like Auggie. Auggie who is wearing a ghost mask overhears this, gets very upset and does not want to go to school any more. A school trip to the mountains brings a great change.

The boy who plays the main character plays very well, but my favourite character is his sister, Via, whose acting is remarkable.

It is an amazing film and I liked it very much. The story is moving and I would recommend the film to everyone. Do not miss it.
